

# ODORIZING UNITS FOR NATURAL GAS DISTRIBUTION NETWORK

ENGINEERED PRODUCTS

- COMPACT CONSTRUCTION
- CUSTOMIZED DESIGN
- MAINTENANCE-FRIENDLY

Bilfinger EMS offers complete solutions for odorizing units that meet the highest requirements of our clients. We are one of the leading suppliers of natural gas odorization units in Germany and Europe.

With your decision to install a Bilfinger EMS odorizing unit you want to ensure a specific amount of odorant is continuously and reliably added to the gas flowing dependent on its actual flow rate. Based on our development activities and experience collected over several decades, we can offer a wide range of odorizing units perfectly designed to fulfill any of the individual requirements our clients might have with respect to size, model and technology applied.

Concerning the aspects of safety, accuracy and reliability our odorizing units assume an essential role in your installation as a whole. All Bilfinger EMS odorizing units are designed and manufactured state-of-the-art. The high quality standards applied throughout all our manufacturing process as well as our reliable and short delivery times are only some examples of our strengths you can benefit from.

Furthermore Bilfinger EMS is your competent partner when it comes to retrofitting and modernizing already existing units or when your target is to find and develop customized solutions for all components.

Benefit from the high degree of flexibility, Bilfinger EMS is able to provide individually engineered solutions on the basis of modular design. All tank sizes, spillage tray and metering pumps are compatible with one other to allow utmost flexibility, so that the whole system may be ideally adapted to suit almost any spatial requirements you might have.
